Larry K. McKee, Jr.
Larry.McKee@nsci-va.org
**Ph. (757) 871-3578**

Mr. McKee is President of the National Security Cyberspace Institute. He has 20 years experience in Information Technology vision, analysis, innovation, and experimentation including C4ISR software engineering, information handling systems, and database design & administration. Mr. McKee frequently serves as an advisor to senior industry and military leaders regarding advanced operational concepts, strategic planning, transition, and funding allocation. He has 15 years experience in contract management and proposal writing. He has successfully led and facilitated multi-organizational teams to complete fast-paced, high visibility projects. Mr. McKee has contributed to Joint Staff and Air Force Instructions, and has authored several innovation and experimentation articles.
